Summary

AI Engineer specializing in Generative AI and Agentic AI systems using LLMs, LangGraph, FastAPI, RAG, Computer Vision, OCR, and PostgreSQL. Experienced in building multi-agent workflows, retrieval pipelines, vector search systems, context-aware AI applications, and scalable AI backend engineering with persistent memory, structured outputs, and workflow orchestration for production-ready AI automation platforms.

Technical Skills

Core CS	Data Structures and Algorithms, OOP, DBMS, Operating Systems
AI	LLMs, Agentic AI, LangGraph/LangChain, RAG, Prompt Engineering, AI Agents, Multi-Agent Systems, Vector Search, Semantic Search, Embedding Models, Tool Calling, Memory Systems
Backend	FastAPI, Flask, REST APIs, JWT Authentication, Node.js
Frontend	React.js, Next.js, TailwindCSS
Database	PostgreSQL, MySQL, SQLite, Supabase, Pinecone
AI Engineering	Prompt Optimization, Retrieval Optimization, Context Engineering, AI Workflow Orchestration, Structured Outputs

Education

Vellore Institute of Technology, Bhopal	2023 – 2027
B.Tech in Computer Science Engineering	CGPA: 8.16

Experience

Software Development Intern — Bluestock	Nov 2025 – Dec 2025
- Built scalable Python backend services and SQL data pipelines with REST APIs, improving analytics performance through query optimization. - Improved query performance through optimization, reducing latency by 15%.	
Open Source Contributor — GirlScript Summer of Code	May 2025 – Aug 2025
- Contributed backend features and bug fixes across open-source projects. - Collaborated through Git workflows, pull requests, and code reviews.	

Projects

AI Tech Stack Recommender	GitHub
FastAPI • React • Groq (Llama 3.1) • React Flow • PostgreSQL	
- Built an AI-powered system design platform that generates technology stacks, architecture diagrams, deployment plans, and development roadmaps using LLMs. - Engineered structured output pipelines with FastAPI and React Flow for AI workflow orchestration, architecture visualization, and scalable recommendation generation.	
LawGPT CRM & AI-SDR Marketing Agent	GitHub
Next.js • FastAPI • OpenAI • Supabase • Computer Vision • OCR	
- Built an AI-powered CRM integrating persistent memory, context-aware AI, intelligent lead qualification, and AI automation workflows for personalized sales engagement. - Developed computer vision, OCR, response caching, and cost-optimized image generation pipelines with scalable AI backend engineering using FastAPI.	
TalentLens – Resume Intelligence Platform	GitHub
Streamlit • Pinecone • Sentence Transformers • RAG • Python	
- Built a RAG-based resume intelligence platform leveraging embedding models, vector search, and semantic search for intelligent candidate retrieval and ranking. - Developed AI-powered skill extraction, retrieval, and recruiter analytics pipelines supporting natural language hiring queries.	

Certifications

- Generative AI with Large Language Models – Coursera
- Career Essentials in Generative AI – Microsoft & LinkedIn
- Google IT Support Professional Certificate

Achievements

- Runner-up – Smart India Hackathon 2025
- Finalist – ET GenAI Hackathon 2025

Leadership

- President, TechnoMech Club – Organized 10+ technical workshops and increased participation by 40%.
- Member, Rewriting the Code (RTC), Global Women in Technology Community
